

US Army

Michael Boyce

Dr. Michael W. Boyce is a research psychologist in the Human Research and Engineering Directorate of the Army Research Laboratory (ARL), where his research focuses on adaptive training systems to improve learner comprehension and performance. Stationed at the United States Military Academy, his current interest is in developing longitudinal assessments of skill as it relates to military training. Dr. Boyce joined the committee in 2017 with the goal of finding collaborative opportunities between HFCC and ARL. He received his doctorate in Applied / Experimental Human Factors Psychology from the University of Central Florida in 2014.
