

## Pipeline and Hazardous Materials Safety Administration (PHMSA)

### **Max Kieba**

Max Kieba is an Engineer for the Engineering and Research Division of the US Department of Transportation (DOT) Pipeline and Hazardous Materials Safety Administration's (PHMSA) Office of Pipeline Safety. In the area of Fatigue Management and Human Factors, Max led the development of inspection criteria and guidance for the Fatigue Mitigation portion of PHMSA's Control Room Management Regulations in 49 CFR Parts 192 and 195, and serves as Instructor for Federal and State inspectors. Max also serves as PHMSA's representative on the DOT Human Factor's Coordinating Committee, established in the early 1990's and whose goals include coordinating cross-modal human factors activities and providing technical support on human factors issues to DOT senior level policy makers. Max has a B.S. in Electrical Engineering from the University of Pennsylvania.
